

TVEP *Christmas Lectures 2009*

The 4th TVEP Christmas Lectures

15th and 16th December

Held in the Centuria Building, Teesside University

*We would like to invite your engineering students specifically, and those studying maths and sciences in general, to the 4th annual Christmas lectures. The purpose of the event is to **entertain and educate** KS3 pupils about the world of engineering and the importance of and vast scope of engineering activities and achievement.*

Being a Christmas event it is designed to be fun and interactive. Those schools that have attended over the last few years will understand the format and we are pleased to have secured the presenting skills of 'Engineering Explained' once again.

We will repeat the presentation twice per day at 10.30am and 1.30pm to try to fit with everyone's timetable.

To book a place for your school please contact Leanne Corry-Shanley on Lcorry-shanley@a4e.co.uk
